## INTRODUCTION

The P55 is a 2.25" (55mm) metal clad, monolithic, stackable panel and modular furniture system. P55 panels are stocked in a variety of heights and widths allowing for almost infinite configurations. Panels and stack tiles are stocked in fabric over metal (W), glass (G) and etched glass (GE). Work surfaces are straight edged with a 2 mm pvc edge banding and include wire management grommets. Top caps and raceway covers are powder coated aluminum and steel. All panels come standard with a CAT6 compliant divided raceway and hangers for Byrne 8-track UL approved modular power system. All panels connect with provided hardware and use machine screws into machine receivers.

The P55 is the erector set of office furniture. You are able to build to suit your needs and your available space. From the same parts we are able to construct freestanding private office furniture, open plan freestanding desks, hybrid workstations, traditional workstations or cubicles; even walls, rooms and doors. This built in flexibility results in design support for different levels of privacy and/or collaboration throughout

an organizations workspace with system that is designed to all work together. Designed for ease of reconfiguration, multipurpose use, and a lifetime of service.

## WARRANTY

Hyer guarantees the P55 system for life, when installed by a Hyer certified installer. This warranty is not transferable and is only available to the original purchaser. This warranty is valid only through the original authorized dealer under which it was purchased, and must be accompanied by a sales receipt. Our warranty covers faults or defects from the manufacturing process. It does not cover abuse or damage resulting from the improper use, care or assembly of the product. Our warranty is limited to repair or replacement of said product at our discretion.
